Product Manager Fahrschulcockpit / Support (m/f/d)

Work Setup: 100% Remote

Your Mission

You are responsible for the content maintenance and further development of our Fahrschulcockpit. You are the primary point of contact for our customers, assisting with inquiries and resolving issues quickly and efficiently. As a Product Manager, you bring your experience from the driving school industry to continuously improve our services and provide our users with an optimal experience.

What Sets you apart

- You have a background in the driving school industry.
- You are service-oriented and enjoy supporting customers and solving problems.
- You are solution-oriented and love to research and develop innovative solutions.
- You have a digital affinity and are comfortable working with ticket systems such as Jira, Zoho Desk, etc.
- You have a good command of written and spoken German and at least a basic knowledge of English.

About Us

We are not just a company; we are a team that believes in constantly challenging the status quo. Our work culture promotes autonomy and creativity, and we value team members who are willing to explore new paths with us. The Fahrschulcockpit GmbH is a young and innovative company in the driving school industry. With our flagship brand [fortbildung33.de](https://www.fortbildung33.de) and subsidiary brands [abibaro.de](https://www.abibaro.de), [fahrschulmonitor.de](https://www.fahrschulmonitor.de), [fahrschulcoach.de](https://www.fahrschulcoach.de), and [fahrschullogo.de](https://www.fahrschullogo.de), we have evolved into a provider of creative and innovative practical solutions for driving schools.

Our product Fahrschulcockpit is the driving school management software that not only improves workflows but completely rethinks them.
